***Bridges to a Thriving Nevada***, an initiative of Opportunity Alliance Nevada addresses economic instability by examining the barriers and resources individuals encounter. We do this by facilitating a number of workshops designed to bring businesses, education, health and human services, and justice systems together to ask if everyone in our community is afforded a 'Fair Shot': safe and affordable housing, access to health care and education, a well-paying job and a means to achieve it. Bridges opens conversations with and between service providers and businesses whose daily work connects them with the lives of people in poverty.

***Bridges to Health and Healthcare:*** This session will review the research on healthcare across a continuum that includes access, availability, cost, quality, efficacy and communication as well as the challenges facing our under-resourced patients and families. Using Bridges constructs, we look at mental models of economic class and the hidden rules that become barriers for our most vulnerable patients/clients to overcome. We will consider the institutional and community resources and relationships necessary for collective efficacy, taking steps to create a healthy community that engages all economic classes at the decision-making table.

The cost for Bridges to Healthcare including the book, *Bridges To Health and Healthcare*, and lunch is \$99.00

If you would like to learn more about the training class, contact Tracy Sherwood at 775-333-8274 or [tracy@opportunityalliancenv.org](mailto:tracy@opportunityalliancenv.org)
